**RULE C-18 30-YEAR CANADA BOND FUTURES  
(SYMBOL - LGB)**

*Effective November 16, 2007*

The sections of this Rule C-18 are applicable only to Futures where the Underlying Interest is Government of Canada bonds as defined in section C-1802, herein referred to as "30-year Canada Bond Futures". For further clarification, this Rule C-18 replaces Rule C-11 in so far as the Underlying Interest is a 30-year Canada Bond.

*November 16, 2007*

**Section C-1801 Definitions**

Notwithstanding Section A-102 for the purposes of 30-year Canada Bond Futures the following terms are as defined:

"Assignment File" means the computer file constructed to enable Tenders to be assigned on a first-in-first-out basis pursuant to Section C-1805.

"Underlying Interest" means Government of Canada Bonds which meet the criteria established in Section C-1802 of this Rule.

**Section C-1802 Delivery Standards**

1. For all 30-year Canada Bond Futures
  - (a) The delivery unit for 30-Year Canada Bond Futures shall be Government of Canada Bonds which do not mature and are not callable for at least 21 years and no more than 33 years from the first calendar day of the Delivery Month, having a coupon rate of 4%, an aggregate face value at maturity of \$100,000, an outstanding face value, net of all potential purchases by the Government of Canada up until the end of the delivery period of the corresponding Delivery Month, of at least \$3.5 billion, are issued and delivered on or before the 15th calendar day preceding the first tender date corresponding to the Delivery Month of the contract, and which are originally issued at 30-year auctions.

All bonds in a delivery unit must be of the same issue.

- (b) Substitution - at the option of the Clearing Member holding the Short Position, bonds with coupon rates other than 4% are deliverable, at a discount for bonds with coupons less than 4%, and at a premium for bonds with coupons more than 4%. The amount of premium or discount for each different deliverable issue shall be determined on the basis of yield equivalency with a 4% bond selling at par. The price at which a bond having a particular maturity and coupon rate will yield 4% shall be determined according to bond tables prepared by the Exchange on which the Future trades. The Settlement Amount of such delivery unit shall be \$1,000 multiplied by the product of such price and the Settlement Price of that series of 30-year Canada Bond Futures. Interest accrued on the bonds shall be charged to the Clearing Member taking delivery.
    - (c) The Exchange on which the Future trades shall publish a list of deliverable issues prior to each Delivery Month. The time to maturity of a given issue is calculated in complete three month increments (rounded down to the nearest quarter) from the first day of the Delivery Month. New issues of Government of Canada bonds which satisfy the standards of this section shall be added to the deliverable list as they are issued by the Government of Canada. In the event that, at any

regular issue or auction, the Government of Canada reopens an existing bond not issued at a 30-year auction that would otherwise meet the standards of this Rule, thus rendering the existing issue indistinguishable from the newly issued one, then the older issue is deemed to meet the standards of this Rule and would be deliverable if the reopening of such an existing issue has a total minimum face value amount of \$3.5 billion during the last 12 month period preceding the first tender date of the contract month. The Exchange shall have the right to exclude any new issue from deliverable status or to further limit outstanding issues from deliverable status, whether or not they otherwise satisfy the standards of this section.

- (d) In the event the Corporation determines that there exists a shortage of deliverable Government of Canada Bond issues it may designate as deliverable on a 30-year Canada Bond Futures such other Government of Canada issues as it deems suitable, and may specify any adjustments in the settlement amount that it considers appropriate and equitable.
